New Delhi, India | +91 9336299321 | contact@theyashrathore.in | LinkedIn | GitHub | Portfolio

SUMMARY

Software Engineer focused on production full-stack applications, cloud-native systems, AI-powered developer tools, and product engineering. Builds real software products across SaaS, offline payments, and agentic AI evaluation; 4x Hackathon Winner with leadership across AWS programs and E-Cell IIT Bombay.

EDUCATION

Deenbandhu Chhotu Ram University of Science and Technology 2025 – 2028
B.Tech in Computer Science Engineering; CGPA: 7.36 Haryana, India

Delhi Skill and Entrepreneurship University 2022 – 2025
Diploma in Computer Engineering; CGPA: 7.78 Delhi, India

TECHNICAL SKILLS

Programming Languages: Java, Python, JavaScript, PHP, SQL, C

Frontend: Next.js, React Native, HTML, CSS, Tailwind CSS

Backend: Node.js, Express.js, REST APIs, Authentication, Authorization, RBAC

Cloud and DevOps: AWS, Amazon EC2, Google Cloud Platform, Docker, Cloudflare, CI/CD, Deployment, Cloud Security, Cloud-Native Architecture

Databases: PostgreSQL, Firebase, Prisma ORM

Developer Tools: Git, GitHub, Linux, VS Code

AI / ML: LLMs, Agentic AI, Prompt Engineering, Gemini API, API Integration

Core CS: Data Structures, Algorithms, OOP, Operating Systems, DBMS, Computer Networks, System Design

EXPERIENCE

E-Cell, IIT Bombay June 2026 – Present
Campus Ambassador Remote / India

- Represented E-Cell IIT Bombay on campus by promoting entrepreneurship initiatives, startup programs, events, and competitions.
- Built student engagement within the entrepreneurial ecosystem through event publicity, outreach, and community-building initiatives.

AWS Student Builder Group DCRUST / AWS Cloud Club DCRUST December 2025 – Present
Technical Lead – Cloud Computing DCRUST

- Led a five-member technical team for cloud education initiatives covering AWS, Docker, CI/CD, Cloud Computing, and deployment workflows.
- Designed and delivered hands-on cloud workshops with live demos to help students understand infrastructure, containers, and production deployment practices.
- Mentored students and organized technical events that strengthened the campus cloud computing and DevOps learning community.

XZECT Labs Pvt. Ltd. June 2024 – August 2024
Full Stack Developer Intern Remote

- Developed full-stack application features using Python, JavaScript, React Native, backend APIs, and Gemini API integration.
- Implemented application optimization and performance improvements across mobile development and backend API workflows.
- Integrated AI-assisted capabilities into application flows using Gemini API while contributing to frontend, backend, and API implementation tasks.

PROJECTS

ClubOps – Production SaaS Platform Production
Next.js, Node.js, TypeScript, Prisma ORM, PostgreSQL, Cloudflare, Tailwind CSS Live Demo

- Built and deployed a production SaaS platform for university club management, event operations, attendance tracking, certificate generation, and role management.

- Implemented authentication, authorization, RBAC, REST API workflows, Prisma ORM data modeling, PostgreSQL persistence, and email automation for operational club workflows.
- Deployed the platform through Cloudflare-backed production infrastructure, serving more than 7,000 requests and receiving more than 800 page views.
- Designed the product around real campus operations, replacing manual club coordination with structured attendance, events, certificates, and automated communication.

EdgePay – Offline Digital Payment Platform

Prototype + Startup

Kotlin, React Native, GSM, USSD, SMS

Live Demo

- Designed an offline digital payment platform for poor-connectivity environments where conventional internet-dependent payment flows fail.
- Implemented payment continuity workflows using GSM, USSD, SMS, fallback mechanisms, and React Native mobile interfaces to support transactions without continuous internet.
- Advanced the prototype as a startup project through hackathon recognition, startup mentorship, and an investor pitch opportunity.
- Positioned the system for financial inclusion by prioritizing reliability, low-connectivity access, and operational continuity in payment workflows.

MergeGuard – AI Code Review Evaluation Framework

Open Source

Python, OpenEnv, Hugging Face, LLMs, Agent Evaluation

GitHub

- Built an AI code review evaluation platform, formerly PullRequest Arena, to benchmark autonomous AI agents on pull request review tasks.
- Developed evaluation workflows for measuring bug detection, patch generation quality, review quality, and correctness across LLM and agentic AI systems.
- Used Python, OpenEnv, Hugging Face tooling, and agent evaluation methods for the Meta x Hugging Face OpenEnv hackathon.
- Released the project as open source to support reproducible evaluation of AI-assisted software engineering workflows.

ACHIEVEMENTS

- 4x Hackathon Winner: Evolotek Hackathon 2026, ORBIX Hackathon – 1st Place Software Track at IIIT-D, HackRust 1.0, and Technophilia 7.0.
- Earned startup mentorship and investor pitch opportunity for EdgePay through Evolotek Hackathon 2026.
- Winner, SQL Master Competition; Selected Contributor, GirlScript Summer of Code 2026.

PUBLICATIONS

- Published technical review paper, “Transformers and Beyond: A Review of Key NLP Developments,” covering Transformer architectures and key NLP developments.

CERTIFICATIONS

- AWS Certified Cloud Practitioner [Verify]
- AlgoUni GEN AI Camp Certification [Verify]
- Google Cloud Skills Boost badges: Cloud Storage, Compute, Dataplex, Google Workspace Tools
